Photographic Science and Engineering

Volume 21, Numbers 1–6

January/February (1)	1–48
March/April (2)	49–102
May/June (3)	103–150
July/August (4)	151–224
September/October (5)	225–292
November/December (6)	293–366

TITLE INDEX

An Introduction to Polavision
E. H. Land, 225

Approximations for Granularity Theory
S. A. Benton, 177

Baking Characteristics of Positive Photoresists
Kiyokatsu Jinno, Yasuo Matsumoto, and T. Shinozaki, 290

Binary Approximation of Continuous Tone Images
P. G. Roetling, 60

Comparison of Photographic and Digital Imagery from Film and Solid-State-Array Remote Sensing Cameras
P. N. Slater, 198

Diffusion Phenomena in Gelatin Sheets
R. Beels and F. H. Claes, 336

Dye Sensitized Bleaching of Surface Silver Specks
S. Getzov and J. Malinowski, 136

Effect of I^- on Interstitial Silver Ions in AgBr(I) Microcrystals
J. V. Burt, 245

Effects of Spatial-Frequency Filtering on the Performance of the Composite Photographic-Human Visual System
A. D. Schnitzler, 209

Electrophoresis of Spectral Sensitizing Dyes on Silver Halide: Evidence for Dye Layering
T. L. Penner, 32

Empirical Density Function Analysis of Photographic Emulsion Gradient Curves
D. A. Pitt, M. L. Rachu, and M. R. V. Sahyun, 331

Errata
A Random Sphere Model for Dye Clouds. E. Trabka, Vol. 21, No. 4, July/Aug. 1977, pp. 183–192, 330
Spectroscopic Study on the J -aggregate of Cyanine Dyes, Part III. C. Honda, H. Hada, Vol. 21, No. 2, March/April, pp. 97–102, 224

ESCA Studies on Structure and Adsorption of Thiolic Antifoggants to AgBr
T. Tani, 317

Evaluation of Coherent Optical Systems
B. J. Thompson and M. E. Krisl, 109

Evidence for Subconduction-Band Events in the Primary Act of Latent Image Formation
P. B. Gilman, Jr., F. J. Evans, and T. D. Koszelak, 296

Experimental Determination of Crosslinking Efficiency in Photoresists
N. J. H. Parham, E. Pitts, and A. Reiser, 145

Explosion Hazard of Ammoniated Silver Salt Solutions
E. A. MacWilliam and M. J. Hazard, 221

Formation of Color Images. Optical Transfer Functions for the Tristimulus Values
J. Bescós and J. Santamaría, 355

Forty Years of Color Photography
W. T. Hanson, Jr., 293

Free Holes in Spectral Sensitization of AgBr
V. I. Saunders, 163

Growth Mechanism of AgBr Crystals in Gelatin Solution
J. S. Wey and R. W. Strong, 14

High DQE Detectors
C. I. Coleman, 49

Hybrid Image Processing
B. Braunecker, R. Hauck, and A. W. Lohmann, 278

Image Formation with Coherent and Partially Coherent Light
H. H. Hopkins, 114

Image Quality and Medical Diagnostic Decision Making
D. J. Goodenough, 262

Image Quality and Patient Exposure in Diagnostic Radiology
Kunio Doi, Kurt Rossmann, and Arthur G. Haus, 269

Imaging in Ternary Chalcogenide Sensors by Photo and Thermal Doping
E. Inoue, H. Yasushima, and K. Kokado, 142

Influence of AgBr Crystal Habit on Bromide and Cyanine Adsorption
W. L. Gardner, D. P. Wrathall, and A. H. Herz, 325

Influence of the Gibbs-Thomson Effect on the Growth Behavior of AgBr Crystals
J. S. Wey and R. W. Strong, 248

Interferometric Evaluation of the Imaging Characteristics of Laser Beams Propagated Through the Turbulent Atmosphere
D. Kelsall, 123

Linear Gradient Model for the Suppression of Aliasing in Sampling Imaging Systems
W. D. Montgomery, 362

Low-Temperature Triboluminescence of Silver Halide Microcrystals
S. Takada, 139

Model for Fluid Ejection and Refill in an Impulse Drive Jet
J. D. Beasley, 78
New Approaches in Densitometry
C. S. McCamy, 103
New Imaging System Utilizing Photoelectrophoretic Behavior of TiO_2
Y. Toyoshima, A. Takahashi, H. Nozaki, T. Iida, and M. Sukigara, 29
Noise Equivalent Parameters in General Medical Radiography: The Present Picture and Future Pictures
R. F. Wagner, 252
On the Electronic and Optical Properties of Red Zinc Oxide
K. Hauffe and M. M. Rahman, 25
On the Phase Reconstruction Problem in Light and Electron Microscopy
H. A. Ferwerda, B. J. Hoenders, A. M. J. Huiser, and P. van Toorn, 282
Photo and Dark Conduction of Crystal Violet-doped (*N*-vinylcarbazole Containing) Polymers for Single Layer Photothermoplastic Devices
D. R. Terrell, 66
Photochemical Aspects of UV Curing
Y. C. Chang, 348
Photoconductivity and Luminescence in AgBr(I) Microcrystals
J. D. Bierlein, 241
Photohole Motion in AgBr(I) Microcrystals
A. M. Kahan, 237
Polarographic Determination of Color Developing Agents in Photographic Processing Solutions
D. R. Canterford, 215
Prediction and Removal of Adjacency Effects from Photographic Images
M. B. Silevitch, R. A. Gonsalves, and D. C. Ehn, 7
Random Model for Grain Interaction Effects in the Photographic Emulsion
William J. Anderson, 1
Random-Sphere Model for Dye Clouds
Eugene A. Trabka, 183
Sensitization of Hydroxy-tetraazaindenes
Tadaaki Tani, 37
Sensitometry of Photoresists for Microelectronics
Donald B. Novotny, 351
Short Communications
Ion Exchange Conversion of Cyanine Dye Iodides to Chloride for Electrochemical Studies
D. J. Curran and A. N. Strohl, 148
Speckle Noise and Object Contrast
B. D. Guenther, Nicholas George, C. R. Christensen, and J. S. Bennett, 192
Spectral Sensitization: A Summary
Burt H. Carroll, 151
Spectroscopic Study on the J-Aggregate of Cyanine Dyes. I. Spectral Changes of UV Bands Concerned with J-Aggregate Formation
H. Hada, C. Honda, and H. Tanemura, 83
II. Circular Dichroism of J-aggregates
C. Honda and H. Hada, 91
III. Effect of Meso Substituents on Molecular Association of Cyanine Dyes
C. Honda and H. Hada, 97
Subjective Effects of Pictorial Noise
T. S. Huang and O. R. Mitchell, 129
Theory and Design of Continuous Tone Diazotype Imaging Films
G. Zweig, 343
Transmission Electron Microscopic Investigation of Photographic Silver Iodobromide Grains
S. J. W. Platzer and V. A. Greenhut, 19
Use of Pyrazoline-based Carrier Transport Layers in Layered Photoconductor Systems for Electrophotography
P. J. Melz, R. B. Champ, L. S. Chang, C. Chiou, G. S. Keller, L. L. Liclican, R. R. Neiman, M. D. Shattuck, and W. J. Weiche, 73
Visual Factors in Photographic Detection, Recognition, and Resolution Tasks. II. Detection and Recognition
W. N. Charman, 204
Weakening of Colloid Protection Leading to Increased Photographic Sensitivity and Fog
G. Buerge, 313

AUTHOR INDEX

Anderson, W. J.
A Random Model for Grain Interaction Effects in the Photographic Emulsion, 1
Beasly, J. D.
Model for Fluid Ejection and Refill in an Impulse Drive Jet, 78
Beels, R., and Claes, F. H.
Diffussion Phenomena in Gelatin Sheets, 336
Bennett, J. S. *See* Guenther, B. D., et al., 192
Benton, S. A.
Approximation for granularity theory, 177
Bescós, J., and Santamaría, J.
Formation of Color Images. Optical Transfer Functions for the Tristimulus Values, 355
Bierlein, J. D.
Photoconductivity and Luminescence in AgBr(I) Microcrystals, 241
Braunecker, B., Hauck, R., and Lohmann, A. W.
